STATE: IDAHO

The Medicaid income limits shown on Page 1 of this Supplement are based on budget allowances for specific living situations. The sum of the budget allowances for a client's specific living arrangement is the client's Medicaid income limit. The budget allowances are a Basic Allowance and, for some living situations, a Special Needs Allowance. Both Special Needs Allowances are as paid, up to a maximum (see Page 1.b.). The Special Needs Allowances are standard amounts. These are: a \$17 Guide Dog Food Allowance for a blind client with a guide dog trained by a recognized guide dog school; a \$50 Eating in Restaurants Allowance for a client who is physically unable to prepare his own meals, as verified by a doctor, or a client who is temporarily without cooking facilities. (The income limits shown on Page 1 do not include income limits for HCBS and Nursing Facility/ICF-MR clients.)

The chart on Page 1.b. shows the allowances used to establish the Medicaid income limit for the recognized living arrangement. These limits may be increased by the Guide Dog Food or Restaurant Meals Allowances, as appropriate.
